

**SID#5 Policy on Erosion Due To Storm Water Runoff from Roads Owned By the SID.  
Adopted Aug. 20, 2003**

**WHEREAS** Sanitary and Improvement District #5 of Cass County, Nebraska, is responsible for the roads and drainage from those roads, we the Board do hereby resolve to address each property owner's request for help with erosion problems on a case-by-case basis. In those cases where insufficient water handling capacity is a contributing factor, the Board will assume responsibility for a share proportionate to that responsibility. While we will not assume all responsibility – in some cases the Board will have no responsibility – we promise each homeowner fair and equitable resolution of their problems.
